Homework 05 - Interviews and Content Logs

Andrew Carter and Beryl Egerter

February 21, 2013

1 Interview: ACBE3

1.1 Post Interview Reflection (Joint)

- Syntax error - immediately said was never on the line the error gives

- Should have asked people about their previous experiences such as grutoring, which could make a huge difference in looking at code

- Huge variety of skill levels we have been getting

- Much better at finding the problem without understanding everything else than previous participants

- Got both of the bugs in Ruby and continued, but stopped immediately after finding bug in python

- debugging problems, resorted to top down (except when given an error with line number)

- for the first two, really didn't need to write on paper to keep track of what was going on

- was thrown off by list syntax in python where code enclosed in brackets means different things in different places

1.2 Interview Summary

Interview length: 53:36m
No technical difficulties encountered. We went through Questions 1.1, 1.2, 2.1, and 2.2, and 3.1 (3.1 cut off by time constraints).

1.3 Most Interesting Pieces
